MOH. AGUS SETIAWAN

Mechanical Engineering | Process Operator | Manufacturing & Production Specialist

Tegal, Indonesia | +6285727082524 | setiawanagus3206@gmail.com

LinkedIn: www.linkedin.com/in/moh-agus-setiawan-68120a1a4

D3 Mechanical Engineering graduate with experience as a Crystallizer Control Room Operator in managing the production process and improving operational efficiency. Skilled in monitoring process parameters, preventive maintenance, and ensuring compliance with SOPs and safety standards. BNSP certified in engineering drawing (2D & 3D) and NC/CNC programming. It has a high orientation towards precision, process stability, and production performance improvement.

EDUCATION

Harapan Bersama Polytechnic

D3 Mechanical Engineering, GPA 3.89/4.00 | Sep 2019 - Aug 2022

Final Project: Design of a 20 ton hydraulic powered press machine using 2018 professional inventor software.

CERTIFICATIONS

BNSP Certification in Engineering Drawing (2D & 3D)

BNSP NC/CNC Programming Certification

Level 1 English Program

Well Operations Crew Resource Management (WOCRM)

EXPERIENCE

PT Ainul Hayat Sejahtera

Crystallizer Operator Control Room | March 2023 – From 2024

- Operate a crystallizer plant and increase salt production efficiency by 15% by ensuring compliance with SOPs and reducing machine downtime through preventive maintenance.
- Monitor key parameters (flowrate, density, pH, tank level, silo level, temperature, and pressure) to optimize the production process, thereby increasing process stability by 10% and reducing material loss by 8%.
- Quickly responds to system warnings and alarms on the crystallizer unit, takes corrective action as per procedures and activates emergency procedures in the event of a blackout, reducing equipment downtime by 20% and ensuring no safety incidents.

Vocational Fish Feed Grant Team of Harapan Polytechnic with

Vocational Feed Grant Research Assistant | February – June 2022

- Prepare fish feed research tools, materials, and equipment, including precision scales and sterile containers, to ensure 100% experimental readiness.
- Measure and record key parameters such as fish growth (weight and length), water quality (pH, temperature, dissolved oxygen), and feed efficiency, by generating approximately 60 accurate data per week to support growth and performance analysis.
- Compile initial reports and document all stages of the research, including testing protocols and daily results, as well as coordinate with the principal investigators, laboratory technicians, and a team of 5 students to run the experiment efficiently, thus achieving 100% timely completion of the task with accurate data.

PT Putra Bungsu

Lathe Operator | Jan – February 2022

- Operates precision lathes with ±0.01 mm tolerances to produce high-quality mechanical components. Verify the dimensions of each workpiece using calipers and micrometers to ensure accuracy. Maintain consistency of product quality according to engineering standards and ensure that all results meet technical specifications and production targets.

Harapan Polytechnic with Mechanical Study Program

Admin of Machinery Study Program | Sep 2019 – Nov 2021

- Calculating lecturers' teaching honorarium (JMK) per semester based on teaching hours by ensuring 100% accuracy. Monitoring the attendance of more than 120 Mechanical Engineering students and compiling monthly attendance reports with 100% collection timeliness for student affairs.
- Manage the official letter archive of the Mechanical Engineering Study Program by ensuring neatness and ease of access to around 20 active documents, as well as handling daily administrative operations and supporting the needs of 10 staff and 120 students efficiently

Hard Skills :

- Lathe, CNC and Crystallizer Control System Operation
- AutoCAD, Autodesk Inventor, SolidWorks, MasterCAM
- Welding, Machine Drawing Engineering, Isometric Pipes, Piping Design, Navisworks

Soft Skills :

- Effective team communication and coordination skills
- Analytical and problem-solving skills
- Good managerial and organizational skills

Language : Indonesian (**Indigenous**), English (**Intermediate**), Japanese (**Basic**).
